SUMMARY

Full Stack Developer with expertise in both frontend and backend development, capable of delivering complete, scalable web applications. Proficient in technologies like MERN, Django, and PostgreSQL, I have a strong foundation in building dynamic user interfaces and efficient server-side architectures. My engineering background and hands-on project experience allow me to handle the entire development cycle, from database management to frontend optimization. I am passionate about creating robust, high-performance solutions that provide seamless user experiences and drive business success.

EDUCATION

Bachelor of Engineering

LJ University
